哈爾濱工程大學
HARBIN ENGINEERING UNIVERSITY

Undergraduate Academic Transcript

Name: LiWenZhuo | Gender: male | Student ID: 2020010810

College: College of Shipbuilding Engineering | Class: 20200117 | Major: Naval Architecture and Ocean Engineering

Modules	Catego	Credit(s)	Mark
2020-2021-1st semester			
Computational thinking (i)	Core	1.0	Excellent
Fundamentals of Engineering Graphics	Core	2.5	94
College English (1)	Core	2.0	69
Engineering Ethics and Engineering Cognition	Core	1.0	Good
Military Training	Core	2.0	Good
Moral Cultivation and Legal Basis	Core	3.0	81
Engineering Mathematical Analysis (1)	Core	4.5	94
Linear Algebra and Analytic Geometry A	Core	3.5	96
Psychological Health Education for College Students	Public optional	1.5	Fair
2020-2021-2st semester			
Computational thinking (ii)	Core	2.0	Good
College English (2)	Core	2.0	90
Physical Education I	Core	1.0	Good
Arduino creative practice introduction	Public optional	1.0	Excellent
Military Theory	Core	2.0	Excellent
Seven military classics generality	Public optional	2.0	Excellent
Outline of China's Modern History	Core	3.0	92
Engineering Mathematical Analysis (2)	Core	5.5	86
Probability Theory and Mathematical Statistics	Core	3.0	94
College Physics I	Core	4.0	97
University Physics Experiment (I)	Core	1.0	Excellent
Peer Counseling	Public optional	1.5	Good
"Fundamentals of Chorus"	Public optional	1.5	Good
2021-2022-1nd semester			
Professional Introduction to Ship and Ocean Engineering	Core	1.0	Good
Scientific and Technological Innovation Methods and Practice of College Students		1.5	Good
Theoretical Mechanics A	Core	4.0	92
Teaching Syllabus for Introduction to Life Science	Public optional	1.5	Good
Electrical Basic Theory and Technics	Core	2.5	87
Environmental Protection and Sustainable Development	Core	2.0	95
College English (3)	Core	1.5	87
Appreciation of PingJu Opera	Public optional	2.0	Excellent
Introduction to the Basic Principles of Marxism	Core	3.0	95
Complex Variables	Core	2.0	91
College Physics II	Core	4.0	92
University Physics Experiment (II)	Core	1.0	Good
Introduction to College Students Innovative Undertaking	Public optional	1.0	Excellent
2021-2022-2nd semester			
Fluid Mechanics of Naval Architecture and Ocean Engineering	Core	4.0	91
Shiphull Strucutre and Graphics	Core	3.0	83
Experiments of Structural Mechanics in Shipbuilding and Ocean Engineering	Core	0.5	Good
Mechanics of Material	Core	4.0	87
Fundamentals of Mechanical Design A (1)	Core	3.5	82
Project Management and Engineering Economic Decision Making	Core	0.5	Good
College English IV	Core	1.5	86
Physical Education II	Core	1.0	Excellent
Introduction to Mao Zedong Thought and Theory System of Socialism with Chinese Characteristics	Core	5.0	90
2022-2023-1nd semester			
Ship and offshore engineering structure Mechanics	Core	4.0	87
Principle of Naval Architecture and Ocean Engineering	Core	4.0	81
Ship Rapidity	Core	3.0	85
Experiments of Structural Mechanics in Shipbuilding and Ocean Engineering	Core	0.5	Good
Materials in Naval Architecture and Ocean Engineering		2.0	85

----------continued on right column---------- ----------continued on next page----------

Notes: 1. Conversion between centesimal system and five-grade marking system: 90≤ Excellent≤100/ 80≤Good<90/ 70≤Fair<80/ 60≤Pass<70/ Fail<60.

2. A mark with the sign ▲ is referral mark, and a mark with the sign ▼ is repeat mark.
A mark with the sign ◆ refers to autonomous examination mark.
A mark with the sign ● is absence/violation and cheat mark.

Harbin Engineering University

HARBIN ENGINEERING UNIVERSITY

Undergraduate Academic Transcript

Name: LiWenZhuo Gender: male Student ID: 2020010810

College: College of Shipbuilding Engineering Class: 20200117 Major: Naval Architecture and Ocean Engineering

Modules	Catego	Credit(s)	Mark
Professional Introduction to Ship and Ocean Engineering		2.0	87
Environmental Mechanics of Ship and Ocean Engineering		1.5	80
Microprocessor Architecture and Embedded System Design		4.0	87
Engineering Practice	Core	4.0	Excellent
Introduction to Xi Jinping Thought of Socialism with Chinese	Core	2.0	88
Situation and Policy	Core	2.0	Excellent
2022-2023-2nd semester			
Strength of Naval Architecture and Ocean Structure	Core	3.0	91
Structural Dynamics of Naval Architecture and Ocean Engineering	Core	3.0	61
Design Principle of Ship and Offshore Platform	Core	3.5	86
Theory and Method of Ship and Offshore Platform Manufacturing	Core	3.0	80
Course Project in Naval Architecture and Ocean Engineering	Core	1.0	Fair
Structural Design of Floating Platforms		1.5	91
Station Keeping System for Floating Structures		1.5	84
English in Ship and Ocean Engineering		2.0	60
Virtual Reality and Simulation in Naval Architecture and Ocean Engineering	Core	1.5	Excellent
Numerical Simulation and Simulation of Marine Environment	Public optional	1.0	Fair
Physical Education III	Core	1.0	Fair
2023-2024-1nd semester			
Curriculum Design of Ship Design Principle	Core	2.0	Excellent
Graduation Practice	Core	2.0	Good
Global performance of floating platform		1.5	71
Design and Analysis of Marine Risers and Pipelines		1.5	80
2023-2024-2nd semester			

----------continued on right column----------

Modules	Catego	Credit(s)	Mark
Graduation Design	Core	14.0	Good
----------Total----------			

Total credites: 172.5 Credits of public optional courses: 13.0

Credits of core modules: 140.5 Credits of specialised optional modules: 19.0

Notes: 1. Conversion between centesimal system and five-grade marking system: 90≤ Excellent≤100/ 80≤Good<90/ 70≤Fair<80/ 60≤Pass<70/ Fail<60.

2. A mark with the sign ▲ is referral mark, and a mark with the sign ▼ is repeat mark.
A mark with the sign ◆ refers to autonomous examination mark.
A mark with the sign ● is absence/violation and cheat mark.
